

## **Timely Tip for January Gardeners From Calloway's Nursery**

The Christmas tree is down and all the holiday decorations are put away. Fill that empty space with something else green and alive! The overall quality of indoor air in our homes and offices has been steadily declining during the past years. The typical indoor living and workplace environment contains low levels of contaminants and chemicals produced by standard latex paints, carpeting, foam insulation, varnishes, adhesives and pressed wood. Many of our interior houseplants are proving to be valuable in the fight against cleaning our inside air. Their leaves act as a filtration process to remove many of these toxic pollutants. Add a touch of green inside today and enjoy a cleaner, greener environment!

For more information, please join us for **FREE** in-store clinics regarding gardening topics. Clinics are held in every store.

### **Saturday, January 15<sup>th</sup> at 10:15 am-Dressing Your Indoors**

*Interior plants can dress up a room quite simply but did you also know that plants can help clean your indoor air? Find out which houseplants do the best job while looking so good.*
